Adobe Illustrator CC (2019) - Part 1 / (CALL) EUR / Days: 1

This course focuses on Adobe® Illustrator® CC (2019), the component within CC used to create "drawn" graphics, while enabling its users to integrate content from other domains (such as photo-oriented graphics and animation, which belong to Adobe® Photoshop® and other applications). With Illustrator's many easily used tools, you will discover that not only can you unlock the same creative impulses you've always had as you've picked up a pencil to sketch out an idea, but also capture those multiple ideas and "what ifs" during the creative process in ways that you never imagined. And for those of you who are just embarking on building your creative skills, you will be surprised at "how good" your work will appear, even at the outset of your exploration of the world of graphic design.

03/02	03/02/22	OLL	10:30 AM - 6:00 PM	DUS
05/03	05/03/22	OLL	10:30 AM - 6:00 PM	DUS

Adobe Illustrator CC (2019) - Part 2 / (CALL) EUR / Days: 1

You have created simple artwork by using the basic drawing and painting tools available in Adobe® Illustrator® CC. You now want to use advanced tools, options, and effects to create complex artwork. In addition, you want to ensure that your artwork is ready for commercial printing and also save it for the web. In this course, you will draw complex illustrations and enhance them by using various painting options. You will also use painting tools, manage colors, format type, work with effects, prepare artwork for commercial printing, and prepare graphics for the web.

This course is a great component of your preparation for the Adobe Certified Expert (ACE) Illustrator CC exam and the Adobe Certified Associate (ACA) Graphic Design & Illustration Using Adobe Illustrator exam.

CertNexus

CertNexus Certified Data Science Practitioner (CDSP) / (CALL) EUR / Days: 5

For a business to thrive in our data-driven world, it must treat data as one of its most important assets. Data is crucial for understanding where the business is and where it's headed. Not only can data reveal insights, it can also inform—by guiding decisions and influencing day-to-day operations. This calls for a robust workforce of professionals who can analyze, understand, manipulate, and present data within an effective and repeatable process framework. In other words, the business world needs data science practitioners. This course will enable you to bring value to the business by putting data science concepts into practice. This course includes the exam voucher for (Exam DSP-110) This course is also designed to assist students in preparing for the CertNexus® Certified Data Science Practitioner (CDSP) (Exam DSP-110) certification.

Cisco® Implementing and Configuring Cisco® Identity Services Engine v3.0 (SISE) / (CALL) EUR / Days: 5

The Implementing and Configuring Cisco Identity Services Engine (SISE) v3.0 course shows you how to deploy and use Cisco® Identity Services Engine (ISE) v2.4, an identity and access control policy platform that simplifies the delivery of consistent, highly secure access control across wired, wireless, and VPN connections. This hands-on course provides you with the knowledge and skills to implement and use Cisco ISE, including policy enforcement, profiling services, web authentication and guest access services, BYOD, endpoint compliance services, and TACACS+ device administration. Through expert instruction and hands-on practice, you will learn how to use Cisco ISE to gain visibility into what is happening in your network, streamline security policy management, and contribute to operational efficiency. This course helps you prepare to take the exam, Implementing and Configuring Cisco Identity Services Engine (300-715 SISE), which leads to CCNP® Security and the Cisco Certified Specialist - Security Identity Management Implementation certifications.

Data Science

CertNexus Data Science for Business Professionals (DSBIZ) / (CALL) EUR / Days: 1

The ability to identify and respond to changing trends is a hallmark of a successful business. Whether those trends are related to customers and sales or to regulatory and industry standards, businesses are wise to keep track of the variables that can affect the bottom line. In today's business landscape, data comes from numerous sources and in diverse forms. By leveraging data science concepts and technologies, businesses can mold all of that raw data into information that facilitates decisions to improve and expand the success of the business.

DevOps

Continuous Delivery Ecosystem Foundation (DevOps Institute) / (CALL) EUR / Days: 2

This course is designed for participants who are engaged in the design, implementation, and management of DevOps deployment pipelines and toolchains that support Continuous Integration, Continuous Delivery, Continuous Testing and potentially Continuous Deployment. The course highlights underpinning processes, metrics, APIs and cultural considerations with Continuous Delivery. Key benefits of Continuous Delivery will be covered including increased velocity to assist organizations to respond to market changes rapidly, thus being able to outmaneuver competition, reduce risk and lower costs while releasing higher quality solutions. Increased productivity and employee morale by having more activities performed by pipelines instead of humans so teams can focus on vision while pipelines do the execution.

This course prepares you for the Continuous Delivery Ecosystem Foundation(CDEF) certification.

Google Cloud

Google Analytics - Foundation / (CALL) EUR / Days: 1

Although it is easy to start using Google Analytics, its robust and complex suite of tools will take time to master. In this course, you will create a Google Analytics account, create multiple web properties to monitor, and tag website pages with Google Analytics tracking code. You will then create multiple views for collecting and analyzing data, and create filters, goals, and funnels for your views. You will then use Google Analytics real-time reports and dashboards to perform quick analysis of your monitored websites. Finally, you will perform more in-depth analysis of website data by using Google Analytics reports.

Certified Information Systems Security Professional (CISSP) / (CALL) EUR / Days: 5

Welcome to Certified Information Systems Security Professional (CISSP): With your completion of the prerequisites and necessary years of experience, you are firmly grounded in the knowledge requirements of today's security professional. This course will expand upon your knowledge by addressing the essential elements of the eight domains that comprise a Common Body of Knowledge (CBK) for information systems security professionals. The course offers a job-related approach to the security process, while providing a framework to prepare for CISSP certification. CISSP is the premier certification for today's information systems security professional. It remains the premier certification because the sponsoring organization, the International Information Systems Security Certification Consortium, Inc. (ISC)2, regularly updates the test by using subject matter experts (SMEs) to make sure the material and the questions are relevant in today's security environment. By defining eight security domains that comprise a CBK, industry standards for the information systems security professional have been established. The skills and knowledge you gain in this course will help you master the eight CISSP domains and ensure your credibility and success within the information systems security field.

EC-Council Certified Ethical Hacker (CEH) v.11 / (CALL) EUR / Days: 5

The Certified Ethical Hacker (CEH) credential is the most trusted ethical hacking certification and accomplishment recommended by employers globally. It is the most desired information security certification and represents one of the fastest-growing cyber credentials required by critical infrastructure and essential service providers. Since the introduction of CEH in 2003, it is recognized as a standard within the information security community. CEH v11 continues to introduce the latest hacking techniques and the most advanced hacking tools and exploits used by hackers and information security professionals today. The Five Phases of Ethical Hacking and the original core mission of CEH remain valid and relevant today: "To beat a hacker, you need to think like a hacker."

EC-Council Certified Network Defender (CND) v.2 / (CALL) EUR / Days: 5

Certified Network Defender (CND) is a vendor-neutral, hands-on, instructor-led comprehensive network security certification training program. It is a skills-based, lab intensive program based on the security education framework and work role task analysis presented by the National Infocomm Competency Framework (NICF) as well as a job-task analysis and cybersecurity education framework by the National Initiative of Cybersecurity Education (NICE). The course has also been mapped to global job roles and to the Department of Defense (DoD) job roles for system/network administrators. The program prepares network administrators how to identify what parts of an organization need to be reviewed and tested for security vulnerabilities and how to reduce, prevent, and mitigate risks in the network. CND covers the protect, detect, respond and predict approach to network security.

ITIL® 4 Foundation / 950 EUR / Days: 2

ITIL® is the world's leading best practice framework for implementing IT Service Management. ITIL version 4 introduces IT Service Management through the lens of a Service Value System (SVS), which provides a holistic end-to-end view of how to successfully contribute to business value, and also how to leverage concepts from models such as Lean IT, Agile, DevOps and Organizational Change Management. This foundational course immerses you in the guiding principles, dimensions, and practices of ITIL® 4. New Horizons is committed to your success beyond the classroom. Your enrollment in this class includes an ITIL 4 certification exam voucher and the official AXELOS ITIL Foundation Guidance e-book. The e-book reinforces what you learned in class and can serve as a reference guide for you and your organization as you begin your ITIL 4 adoption. The ITIL 4 Foundation certification is required before you can get any of the Managing Professional or Strategic Leader certifications. Extra resources with this class also include Sample Papers with Practice Exam questions and a Study Guide.

Dare to Lead™ / (CALL) EUR / Days: 6

This workshop is all about your own leadership self-awareness, identifying your call to courage as a leader and the learning, practice and integration of the four courage skills sets so you can show up authentically in life and leadership. Dare to Lead™ is the ultimate playbook for developing brave leaders and courageous cultures. The greatest barrier to daring leadership is not fear; the greatest obstacle is armor – we self-protect when we feel uncertainty, risk and emotional exposure. Learn the skills to move from armored leadership to daring leadership. Daring leaders are self-aware, know how to have hard conversations, hold themselves and others accountable, build trust, lead with empathy and connection, take smart risks that lead to innovation, reset quickly after disappointments and setbacks, and give and receive feedback.

This interactive curriculum is delivered in five, half-day sessions and is based on the research by Brené Brown.

This course comes with a PDF workbook and an Amazon gift card to purchase the Dare to Lead™ book in the version of your choice. You also have access to a series of leadership and personal development assessments and exclusive training videos led by Dr. Brené Brown. At the end of the event, a digital badge is awarded to those who complete 24 hours of course content.

MS-900T01 Microsoft 365 Fundamentals / (CALL) EUR / Days: 1

This course provides foundational knowledge on the considerations and benefits of adopting cloud services and the Software as a Service (SaaS) cloud model, with a specific focus on Microsoft 365 cloud service offerings. You will begin by learning about cloud fundamentals, including an overview of cloud computing and specifically Microsoft cloud services. You will be introduced to Microsoft Azure, and you will examine the differences between Microsoft 365 and Office 365. You will then perform an in-depth review of Microsoft 365, including a comparison of Microsoft on-premises services versus Microsoft 365 cloud services, a review of enterprise mobility in Microsoft 365, and an analysis of how Microsoft 365 services provide collaboration. The course then analyzes how security, compliance, privacy, and trust are handled in Microsoft 365, and it concludes with a review of Microsoft 365 subscriptions, licenses, billing, and support.

SC-200T00 Microsoft Security Operations Analyst / (CALL) EUR / Days: 4

Learn how to investigate, respond to, and hunt for threats using Microsoft Azure Sentinel, Azure Defender, and Microsoft 365 Defender. In this course you will learn how to mitigate cyberthreats using these technologies. Specifically, you will configure and use Azure Sentinel as well as utilize Kusto Query Language (KQL) to perform detection, analysis, and reporting. The course was designed for people who work in a Security Operations job role and helps learners prepare for the exam SC-200: Microsoft Security Operations Analyst.

Course Schedule

Microsoft Access for Office 365 (Desktop or Online) - Part 1 / (CALL) EUR / Days: 2

In this introductory course, you will discover the capabilities of Microsoft Access, a relational database application that can help you and your organization manage your complex data.

03/07	03/08/22	OLL	3:00 PM - 11:00 PM	DUS
04/18	04/19/22	OLL	3:00 PM - 11:00 PM	DUS
06/13	06/15/22	OLL	5:00 PM - 1:00 AM	DUS

Microsoft Access for Office 365 (Desktop or Online) - Part 2 / (CALL) EUR / Days: 2

In this course, you will expand your knowledge of relational database design; promote quality input from users; improve database efficiency and promote data integrity; and implement advanced features in tables, queries, forms, and reports. Extending your knowledge of Access will result in a robust, functional database for your users.

This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Access Expert (Office 365 and Office 2019): Exam MO-500 certification.

02/24	02/26/22	OLL	5:00 PM - 1:00 AM	DUS
04/20	04/21/22	OLL	3:00 PM - 11:00 PM	DUS

Microsoft Azure

AI-102T00 Designing and Implementing a Microsoft Azure AI Solution / 1990 EUR / Days: 4

AI-102 Designing and Implementing an Azure AI Solution is intended for software developers wanting to build AI infused applications that leverage Azure Cognitive Services, Azure Cognitive Search, and Microsoft Bot Framework. The course will use C# or Python as the programming language.

03/01	03/04/22	OLL	3:00 PM - 11:00 PM	DUS
06/21	06/25/22	OLL	5:00 PM - 1:00 AM	DUS
08/08	08/11/22	OLL	9:00 AM - 5:00 PM	DUS

AI-900T00 - Microsoft Azure AI Fundamentals / 690 EUR / Days: 1

This course introduces fundamentals concepts related to artificial intelligence (AI), and the services in Microsoft Azure that can be used to create AI solutions. The course is not designed to teach students to become professional data scientists or software developers, but rather to build awareness of common AI workloads and the ability to identify Azure services to support them. The course is designed as a blended learning experience that combines instructor-led training with online materials on the Microsoft Learn platform (<https://azure.com/learn>). The hands-on exercises in the course are based on Learn modules, and students are encouraged to use the content on Learn as reference materials to reinforce what they learn in the class and to explore topics in more depth.

AI-900T00 - Microsoft Azure AI Fundamentals / 690 EUR / Days: 1

This course introduces fundamentals concepts related to artificial intelligence (AI), and the services in Microsoft Azure that can be used to create AI solutions. The course is not designed to teach students to become professional data scientists or software developers, but rather to build awareness of common AI workloads and the ability to identify Azure services to support them. The course is designed as a blended learning experience that combines instructor-led training with online materials on the Microsoft Learn platform (<https://azure.com/learn>). The hands-on exercises in the course are based on Learn modules, and students are encouraged to use the content on Learn as reference materials to reinforce what they learn in the class and to explore topics in more depth.

AZ-010T00 Azure Administration for AWS SysOps / 1060 EUR / Days: 2

This two-day course is designed for AWS Sysops administrators interested in learning how Azure is administered. In this workshop which combines lecture with hands-on practical exercises and discussion/review, you will be introduced to Azure Administration, Azure Networking, Azure Compute, Azure Storage, and Azure Governance. During the workshop, you will apply this knowledge - building end-to-end architecture that demonstrates the main features discussed.

DP-050T00 Migrate SQL workloads to Azure / (CALL) EUR / Days: 2

In this course, the students will explore the objectives of data platform modernization and how it is suitable for given business requirements. They will also explore each stage of the data platform modernization process and define what tasks are involved at each stage, such as the assessment and planning phase. Students will also learn the available migration tools and how they are suitable for each stage of the data migration process. The student will learn how to migrate to the three target platforms for SQL based workloads; Azure Virtual Machines, Azure SQL Databases and Azure SQL Database Managed Instances. The student will learn the benefits and limitations of each target platform and how they can be used to fulfil both business and technical requirements for modern SQL workloads. The student will explore the changes that may need to be made to existing SQL based applications, so that they can make best use of modern data platforms in Azure.

DP-100T01 Designing and Implementing a Data Science Solution on Azure / 1550 EUR / Days: 3

Gain the necessary knowledge about how to use Azure services to develop, train, and deploy, machine learning solutions. The course starts with an overview of Azure services that support data science. From there, it focuses on using Azure's premier data science service, Azure Machine Learning service, to automate the data science pipeline. This course is focused on Azure and does not teach the student how to do data science. It is assumed students already know that.

DP-200T01 Implementing an Azure Data Solution / 1550 EUR / Days: 3

In this course, students will implement various data platform technologies into solutions that are in line with business and technical requirements including on-premises, cloud, and hybrid data scenarios incorporating both relational and No-SQL data. They will also learn how to process data using a range of technologies and languages for both streaming and batch data.

Students will also explore how to implement data security including authentication, authorization, data policies and standards. They will also define and implement data solution monitoring for both the data storage and data processing activities. Finally, they will manage and troubleshoot Azure data solutions which includes the optimization and disaster recovery of big data, batch processing and streaming data solutions.

DP-201T01 - Designing an Azure Data Solution / 1060 EUR / Days: 2

In this course, students will design various data platform technologies into solutions that are in line with business and technical requirements. This can include on-premises, cloud, and hybrid data scenarios which incorporate relational, No-SQL or Data Warehouse data. Students will also learn how to design process architectures using a range of technologies for both streaming and batch data.

Students will also explore how to design data security including data access, data policies and standards. They will also design Azure data solutions which includes the optimization, availability and disaster recovery of big data, batch processing and streaming data solutions.

DP-203T00 Data Engineering on Microsoft Azure / (CALL) EUR / Days: 4

In this course, the student will learn about the data engineering patterns and practices as it pertains to working with batch and real-time analytical solutions using Azure data platform technologies. Students will begin by understanding the core compute and storage technologies that are used to build an analytical solution. They will then explore how to design an analytical serving layers and focus on data engineering considerations for working with source files. The students will learn how to interactively explore data stored in files in a data lake. They will learn the various ingestion techniques that can be used to load data using the Apache Spark capability found in Azure Synapse Analytics or Azure Databricks, or how to ingest using Azure Data Factory or Azure Synapse pipelines. The students will also learn the various ways they can transform the data using the same technologies that is used to ingest data. The student will spend time on the course learning how to monitor and analyze the performance of analytical system so that they can optimize the performance of data loads, or queries that are issued against the systems. They will understand the importance of implementing security to ensure that the data is protected at rest or in transit. The student will then show how the data in an analytical system can be used to create dashboards, or build predictive models in Azure Synapse Analytics.

DP-900T00 Microsoft Azure Data Fundamentals / (CALL) EUR / Days: 1

In this course, students will learn the fundamentals of database concepts in a cloud environment, get basic skilling in cloud data services, and build their foundational knowledge of cloud data services within Microsoft Azure. Students will identify and describe core data concepts such as relational, non-relational, big data, and analytics, and explore how this technology is implemented with Microsoft Azure. They will explore the roles, tasks, and responsibilities in the world of data. The students will explore relational data offerings, provisioning and deploying relational databases, and querying relational data through cloud data solutions with Microsoft Azure. They will explore non-relational data offerings, provisioning and deploying non-relational databases, and non-relational data stores with Microsoft Azure. Students will explore the processing options available for building data analytics solutions in Azure. They will explore Azure Synapse Analytics, Azure Databricks, and Azure HDInsight. Students will learn what Power BI is, including its building blocks and how they work together.

Microsoft Cloud and Big Data

Microsoft Power BI: Data Analysis Practitioner (Second Edition) / (CALL) EUR / Days: 2

As technology progresses and becomes more interwoven with our businesses and lives, more data is collected about business and personal activities. This era of "big data" is a direct result of the popularity and growth of cloud computing, which provides an abundance of computational power and storage, allowing organizations of all sorts to capture and store data. Leveraging that data effectively can provide timely insights and competitive advantages. Creating data-backed visualizations is key for data scientists, or any professional, to explore, analyze, and report insights and trends from data. Microsoft® Power BI® software is designed for this purpose. Power BI was built to connect to a wide range of data sources, and it enables users to quickly create visualizations of connected data to gain insights, show trends, and create reports. Power BI's data connection capabilities and visualization features go far beyond those that can be found in spreadsheets, enabling users to create compelling and interactive worksheets, dashboards, and stories that bring data to life and turn data into thoughtful action.

Data Analysis and Visualization with Microsoft Excel / (CALL) EUR / Days: 2

Analyzing data to find issues, insights and opportunities, is now a critical part of many job roles. Beyond the analysis, data analysts in all job roles must be able to effectively present and communicate their findings in visually compelling ways. Microsoft® Excel® is designed for this purpose. Excel can connect to a wide range of data sources, perform robust data analysis and create diverse and robust data-backed visualizations to show insights, trends, and create reports. These capabilities enable people who use Excel for data analysis to turn data into thoughtful action.

Excel 2016/2019 - Data Analysis with PivotTables / (CALL) EUR / Days: 1

Advances in technology have made it possible to store ever-increasing amounts of data. Along with this, the need to analyze that data and gain actionable insight is greater than ever. Participants already have experience working with Excel and creating basic PivotTables to summarize data. But Excel is capable of doing much more. Being able to harness the power of advanced PivotTable features and create PivotCharts will help participants gain a competitive edge. Participants will not only be able to summarize data to analyze, but also organize the data in a way that can be meaningfully presented to others. This leads to data-driven business decisions that have a better chance for success for everyone involved.

Excel 2016/2019 - Data Analysis with Power Pivot / (CALL) EUR / Days: 1

We are now living in the age of big data. Data is being collected all the time and for increasingly detailed transactions. This can lead to an overwhelming amount of data, which brings about a need for people who can analyze large amounts of data quickly. Fortunately, Excel provides Power Pivot to help you organize, manipulate, and report on your data in the best way possible. Since a tool is only as good as the person using it, it is important to gain a solid understanding of Power Pivot to maximize your effectiveness when analyzing data.

Along with this, the need to analyze data and gain actionable insight is greater than ever. You already have experience working with Microsoft® Excel; and creating basic PivotTables to summarize data. But Excel is capable of doing much more. Being able to harness the power of advanced PivotTable features and create PivotCharts will help you to gain a competitive edge. You will not only be able to summarize data for you to analyze, but also organize the data in a way that can be meaningfully presented to others. This leads to data-driven business decisions that have a better chance for success for everyone involved. This course presents information and skills that are appropriate for users of either the Office 2021 or Office 365 applications. However, the instructional environment for the delivery of this course utilizes Office 365.</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr><td>01/28 · 01/28/22</td><td>OLL</td><td>7:00 PM - 11:00 PM</td><td>DUS</td></tr> <tr><td>03/11 · 03/12/22</td><td>OLL</td><td>9:30 PM - 1:00 AM</td><td>DUS</td></tr> <tr><td>04/22 · 04/22/22</td><td>OLL</td><td>7:00 PM - 11:00 PM</td><td>DUS</td></tr> </table>	02/10 · 02/10/22	OLL	3:00 PM - 11:00 PM	DUS	02/24 · 02/24/22	OLL	3:00 PM - 11:00 PM	DUS	03/03 · 03/04/22	OLL	5:00 PM - 1:00 AM	DUS	03/17 · 03/17/22	OLL	2:00 PM - 10:00 PM	DUS	03/24 · 03/24/22	OLL	2:00 PM - 10:00 PM	DUS	04/08 · 04/09/22	OLL	5:00 PM - 1:00 AM	DUS	04/15 · 04/15/22	OLL	3:00 PM - 11:00 PM	DUS	05/05 · 05/05/22	OLL	3:00 PM - 11:00 PM	DUS	05/20 · 05/21/22	OLL	5:00 PM - 1:00 AM	DUS	05/26 · 05/26/22	OLL	3:00 PM - 11:00 PM	DUS	06/10 · 06/10/22	OLL	3:00 PM - 11:00 PM	DUS	06/16 · 06/17/22	OLL	5:00 PM - 1:00 AM	DUS	06/30 · 06/30/22	OLL	3:00 PM - 11:00 PM	DUS	01/28 · 01/28/22	OLL	7:00 PM - 11:00 PM	DUS	03/11 · 03/12/22	OLL	9:30 PM - 1:00 AM	DUS	04/22 · 04/22/22	OLL	7:00 PM - 11:00 PM	DUS	<p>Microsoft Excel for Office 365 (Desktop or Online) - Part 1 / (CALL) EUR / Days: 1</p> <p>This course aims to provide you with a foundation for Excel knowledge and skills, which you can build upon to eventually become an expert in data manipulation. Microsoft Excel for Office 365 or Office 2019: Dashboards [v1.01] / (CALL) EUR / Days: 1

Today's world runs on data more than ever before and that's a trend not likely to change, or even slow down, any time soon. With the tremendous amount of available data, the ability to make sense of it continues to be an ongoing challenge. You already know how to use Excel to perform simple calculations and modify worksheets to make them easier to read, interpret, and present to others. But Excel is capable of doing so much more.

To gain a truly competitive edge, you need to be able to extract actionable organizational intelligence from your raw data, and present it in a visually compelling format that enables decision makers to view key trends and gain insights. And that's exactly what this course aims to help you do.

This course builds upon the foundational knowledge presented in the Microsoft® Excel®; for Office 365™; (Desktop or Online): Part 1 course and introduces the basics of data analysis and how to use Excel to create informative dashboards.

Microsoft Outlook

Microsoft Outlook 2019/2021: Part 1 / (CALL) EUR / Days: 1

Email has become one of the most widely used methods of communication, whether for personal or business communications. In most organizations, large or small, email is the preferred form of communicating information amongst employees. As email grows in popularity and use, most organizations have found the need to implement a corporate mail management system such as Microsoft® Office Outlook® to handle the messages and meeting invitations sent among employees.

In this course, you will use Outlook to send, receive, and manage email messages, manage your contact information, schedule appointments and meetings, create tasks and notes for yourself, and customize the Outlook interface to suit your working style. This material will benefit users of any current Office version. The classroom environment setup is based on Office 2019.

This course is the first in a series of two Microsoft® Office Outlook®; 2019/2021 courses. It will provide you with the basic skills you need to start using Outlook 2019/2021 to manage your email communications, contact information, calendar events, tasks, and notes.

This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Outlook Associate (Office 365 and Office 2019): Exam MO-400 certification.

Microsoft Outlook 2019/2021: Part 2 / (CALL) EUR / Days: 1

Every day, millions of email messages are exchanged among people within and between organizations. Email has a ubiquitous presence in the lives of many, and it's likely that email technologies will continue to evolve with the changing needs of workplaces. After all, email communication has not been replaced, or its growth slowed, as many predicted with the rise of social media and the widespread adoption of mobile technologies. Many organizations have implemented mail management systems that combine the back-end power of Microsoft® Exchange Server and the front-end intuitive user interface of Microsoft® Office Outlook®; 2019.

In this course, you will customize command sets, configure mail accounts, set global options, perform advanced searches, apply filters to intercept mail and control spam, create rules to automate mail management tasks, work with calendars and contacts, manage tasks, preserve data with archives and data files, as well as share and delegate access to your Outlook items. In short, you'll work with a wide range of features and options and, in so doing, understand why Outlook is a leading personal management system.

This material will benefit users of any current Office version. The classroom environment setup is based on Office 2019.

This course builds upon the foundational knowledge presented in the Microsoft® Office Outlook®; 2019/2021: Part 1 course and will help you customize a communication system well-suited to your work style. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the Outlook Associate (Office 365 and Office 2019): Exam MO-400 certification.

Microsoft Office PowerPoint 2019 - Part 2 / (CALL) EUR / Days: 1

Meetings, instruction, training, pitches; these are all a part of our daily lives. We are often called upon to deliver presentations with little notice, at multiple venues, and with varying requirements. And, some of these presentations include sensitive information that needs to be guarded. Given all the variables, it may seem an overwhelming task to deliver your content, on time, to all audiences, and to only those who need to see it. Oh, and by the way, you need to make it interesting, informative, and memorable. So, how do you do it? Without the help of a robust set of tools, it would be nearly impossible. But Microsoft® Office PowerPoint® 2019 provides you with a variety of such tools that can help you deliver content in nearly any situation, while saving time and effort. By taking advantage of these tools, you will be creating presentations that not only stand out from the crowd, but also don't consume all of your available time. This course covers Microsoft Office Specialist Program exam objectives to help you prepare for the PowerPoint Associate (Office 365 and Office 2019): Exam MO-300.

Course Schedule

Database Design - A Modern Approach / (CALL) EUR / Days: 1

This course introduces you to a process for effectively planning and designing a functional, efficient database. Knowing how to plan a relational database is important to the success of the databases you create. Without planning, you cannot possibly know what the database needs to do, or even what information to include in the database. Planning a database is essential, and prevents the extra work of fixing data maintenance problems later on.

The concepts are not specific to a particular software application and can be applied to any relational database management system.

Microsoft Visio

Microsoft Visio 2019/2021: Part 1 (v1.1) / (CALL) EUR / Days: 1

From the earliest eras of human existence, visual images have been used to represent knowledge, data, and information. Beginning with the Paleolithic cave paintings and continuing to today's most complex computer networks, these images leverage the ability of the human brain to rapidly perceive patterns and trends from visual representations. In today's workplace, visual diagrams are an essential part of communication, from road maps to sales flows to process charts. Microsoft® Visio® provides you with an intuitive, customizable tool to easily create a professional-looking visual product by using its extensive gallery of shapes. By following the exercises in this course, you will create visually engaging diagrams, maps, and drawings, using graphical elements to make information easier to comprehend. This material will benefit users of any current Office version. The classroom environment setup is based on Office 2019.

Microsoft Visio 2019/2021: Part 2 (v1.1) / (CALL) EUR / Days: 1

Microsoft® Visio® stands out among similar applications because of its unique ability to draw a wide variety of diagrams, flowcharts, workflows, and organization structures—anything that can be represented by shapes connected by lines. Most importantly, these shapes can be rearranged and with corresponding lines remaining intact. Visio has improved over the years as features common among Microsoft® Office applications have been added. Today, Visio is well integrated with other members of the Office family as well as Microsoft's cloud-based services. This greatly enriches the sharing and publishing of Visio drawings. In Microsoft® Visio®; 2019/2021: Part 1, you learned the basic skills needed to create and modify various Visio drawings. In Microsoft® Visio®; 2019/2021: Part 2, you will learn about more advanced features—making you a more efficient and effective Visio user. This material will benefit users of any current Office version. The classroom environment setup is based on Office 2019.

Though Python® has been in use for nearly thirty years, it has become one of the most popular languages for software development, particularly within the fields of data science, machine learning, artificial intelligence, and web development—all areas in which Python is widely used. Whether you're relatively new to programming, or have experience in other programming languages, this course will provide you with a comprehensive first exposure to the Python programming language that can provide you with a quick start in Python, or as the foundation for further learning.

You will learn elements of the Python 3 language and development strategies by creating a complete program that performs a wide range of operations on a variety of data types, structures, and objects, implements program logic through conditional statements and loops, structures code for reusability through functions, classes, and modules, reads and writes files, and handles error conditions

Using Data Science Tools in Python (v1.0) / (CALL) EUR / Days: 2

More and more organizations are turning to data science to help guide business decisions. Regardless of industry, the ability to extract knowledge from data is crucial for a modern business to stay competitive. One of the tools at the forefront of data science is the Python® programming language. Python's robust libraries have given data scientists the ability to load, analyze, shape, clean, and visualize data in easy to use, yet powerful, ways. This course will teach you the skills you need to successfully use these key libraries to extract useful insights from data, and as a result, provide great value to the business

SAP Training

SAP Crystal Reports 2020: Part 1 / (CALL) EUR / Days: 2

Organizations use reporting tools to access data sources and generate customized reports. SAP®; Crystal Reports®; 2020 enhances report building and report processing techniques with a variety of features that add value to a presentation. In this course, you will create a basic report by connecting to a database and modifying the report's presentation. Information is critical to making sound business decisions. Data presented without any formatting or structure holds little or no meaning for interpretation. Crystal Reports 2020 helps you build advanced reports with ease, presenting complex information in an understandable way.

Course Schedule

SAP Crystal Reports 2020: Part 2 / (CALL) EUR / Days: 2

Until now, you have used SAP®; Crystal Reports®; to build and modify reports. You want to use the advanced functionality of Crystal Reports to generate reports in the format you desire. In this course, you will create complex reports and data sources using the tools in Crystal Reports 2020. You will not only create more sophisticated reports, including subreports and cross-tabs, but you will also increase the speed and efficiency of your reports by using SQL queries. Even though you are familiar with Crystal Reports, you may take some time to study its various tools that enable you to generate reports with the desired data using advanced methods such as SQL querying. This way, you won't be slowed down by large databases or databases with which you are unfamiliar. By creating subreports, cross-tabs, and running totals, you will turn raw data into meaningful, customized reports that will help your business run more smoothly. If you work with large databases, you may find yourself faced with performance issues. In this course, you will also learn to use tools that can increase the speed with which data is retrieved.

Tableau

Tableau Desktop: Part 1 (Second Edition) (v1.0) / (CALL) EUR / Days: 2

As technology progresses and becomes more interwoven with our businesses and lives, more and more data is collected about business and personal activities. This era of "big data" has exploded due to the rise of cloud computing, which provides an abundance of computational power and storage, allowing organizations of all sorts to capture and store data. Leveraging that data effectively can provide timely insights and competitive advantage. The creation of data-backed visualizations is a key way data scientists, or any professional, can explore, analyze, and report insights and trends from data. Tableau®; software is designed for this purpose. Tableau was built to connect to a wide range of data sources and allows users to quickly create visualizations of connected data to gain insights, show trends, and create reports. Tableau's data connection capabilities and visualization features go far beyond those that can be found in spreadsheets, allowing users to create compelling and interactive worksheets, dashboards, and stories that bring data to life and turn data into thoughtful action.
